11.9. How to assign a party (user) to a work	28
11.10. How to assign products produced to a work	29
11.11. How to associate requirements to a work	29
12. Standards (Related to work types)	30
12.1. How to search for work types	30
12.2. How to create a new Work Type	30
12.3. How to update a work type	31
12.4. How to delete a work type	31
12.5. How to assign fixed asset standards to a work type	31
12.6. How to assign part standards to a work type	32
12.7. How to assign skill standards to a work type	32

1. Deliverable

The deliverable to be delivered for a work.

1.1. How to search for deliverables

1. Select the menu option Others->Deliverable->Search
2. Enter the following information: (All fields are optional)

Field Name	Remarks
DeliverableId	Deliverable Id.
DeliverableType	Deliverable type code
Name	Name. Will match partial names.

3. Press the 'Query' button. The list of deliverables which meet the search criteria will be displayed.
4. To see further details of a specific deliverable click on the deliverable id link.

1.2. How to create a new deliverable

1. Select the menu option Others->Deliverable->new
2. Enter the following information:

Note: The Deliverable Id will be assigned by the system when the form is submitted.

Field Name	Remarks
DeliverableType	Deliverable type code
Name	Name
Description	Description

3. Press the submit button.
4. Press the ok button on the confirmation page.
5. The system will display a message on the status of the submit.

1.3. How to update a deliverable

1. Follow instructions as per How to search for deliverables and bring up the record.
2. Make modifications.

Field Name	Remarks
DeliverableType	Deliverable type code
Name	Name
Description	Description

3. Press the update button.
4. Press the ok button on the confirmation page.
5. The system will display a message on the status of the update.

1.4. How to delete a deliverable

1. Follow instructions as per How to search for deliverable and bring up the record.
2. Press the delete button.
3. Press ok button on the confirmation page.
4. The system will display a message on the status of the delete.

2. Facility

The facility. Examples:

- Facility where a work effort takes place.
- Facility where a certain part is stored.

2.1. How to search for facility

1. Select the menu option Others->Facility->Search
2. Enter the following information:

Field Name	Remarks
Facility	Facility code
FacilityType	Facility type code
Name	Name. Will match partial names.

3. Press the 'Query' button. The list of facilities which meet the search criteria will be displayed.
4. To see further details of a specific facility click on the facility code link.

2.2. How to create a new facility

1. Select the menu option Others->Facility->new
2. Enter the following information:

Field Name	Remarks
Facility	Facility code
FacilityType	Facility type code
Name	facility name
Description	Facility description

3. Press the submit button.
4. Press the ok button on the confirmation page.
5. The system will display a message on the status of the submit.

2.3. How to update a facility

1. Follow instructions as per How to search for facility and bring up the record.
2. Make modifications.

Field Name	Remarks
FacilityType	Facility type code
Name	facility name
Description	Facility description

3. Press the update button.
4. Press the ok button on the confirmation page.
5. The system will display a message on the status of the update.

2.4. How to delete a facility

1. Follow instructions as per How to search for facility and bring up the record.
2. Press the delete button.
3. Press ok button on the confirmation page.
4. The system will display a message on the status of the delete.

3. FixedAsset

The fixed assets. Examples.

- Machinery
- Equipment.
- Vehicles.

3.1. How to search for fixed assets

1. Select the menu option Others->FixedAsset->Search
2. Enter the following information: (All fields are optional)

Field Name	Remarks
FixedAssetCode	Fixed asset code
FixedAssetType	Fixed asset type
Name	Name. Will match partial names.

3. Press the 'Query' button. The list of fixed assets which meet the search criteria will be displayed.
4. To see further details of a specific fixed asset click on the fixed asset link.

3.2. How to create a new fixed asset

1. Select the menu option Others->FixedAsset->new
2. Enter the following information:

Field Name	Remarks
FixedAssetCode	Fixed asset code
FixedAssetType	Fixed asset type
Name	Name
Description	Description
AcquiredDt	Acquired date
LastServiceDt	Last service date
NextServiceDt	Next service date

3. Press the submit button.
4. Press the ok button on the confirmation page.
5. The system will display a message on the status of the submit.

3.3. How to update a fixed asset

1. Follow instructions as per How to search for fixed assets and bring up the record.
2. Make modifications.

Field Name	Remarks
FixedAssetType	Fixed asset type
Name	Name
Description	Description
AcquiredDt	Acquired date
LastServiceDt	Last service date
NextServiceDt	Next service date

3. Press the update button.
4. Press the ok button on the confirmation page.
5. The system will display a message on the status of the update.

3.4. How to delete a fixed asset

1. Follow instructions as per How to search for fixed assets and bring up the record.
2. Press the delete button.
3. Press ok button on the confirmation page.

4. The system will display a message on the status of the delete.

4. Part

4.1. How to search for parts

1. Select the menu option Others->Part->Search
2. Enter the following information: (All fields are optional)

Field Name	Remarks
Part	Part code
PartType	Part type
Name	Name. Will match partial names.

3. Press the 'Query' button. The list of parts which meet the search criteria will be displayed.
4. To see further details of a specific part click on the parts link.

4.2. How to create a new part

1. Select the menu option Others->Part->new
2. Enter the following information:

Field Name	Remarks
Part	Part code
Manufacturer	Manufacturer code
Name	Name
Description	Description
PartType	Part type code
PartStatus	Part status code
Facility	Facility code. Where the part is stored
Container	Container code. Which container part is stored
Lot	Lot code. Which lot part is stored

3. Press the submit button.
4. Press the ok button on the confirmation page.
5. The system will display a message on the status of the submit.

4.3. How to update a part

1. Follow instructions as per How to search for parts and bring up the record.

2. Make modifications.

Field Name	Remarks
Manufacturer	Manufacturer code
Name	Name
Description	Description
PartType	Part type code
PartStatus	Part status code
Facility	Facility code. Where the part is stored
Container	Container code. Which container part is stored
Lot	Lot code. Which lot part is stored

3. Press the update button.
4. Press the ok button on the confirmation page.
5. The system will display a message on the status of the update.

4.4. How to delete a part

1. Follow instructions as per How to search for parts and bring up the record.
2. Press the delete button.
3. Press ok button on the confirmation page.
4. The system will display a message on the status of the delete.

5. Party

A party can either be a person or an organization.

5.1. How to search for parties (users)

1. Select the menu option Party->Search
2. Enter the following information: (All fields are optional)

Field Name	Remarks
PartyCode	Party Code
PartyType	Party type code. Party can be for example a person or an organization
LastName	Last name of person
FirstName	First name of person
MiddleName	Middle name of person
OrganizationName	Name of organization

3. Press the 'Query' button. The list of parties (users) which meet the search criteria will be displayed.
4. To see further details of a specific party click on the party code link.

5.2. How to create a new party (user)

Once the party has been created in the system, make sure they are assigned a password using the Other->ChangePassword. Also a security role (see How to assign a security role to a party) has to be assigned to the party . Without the password being set and security role assigned the party will not be able to access the system.

1. Select the menu option Party->new
2. Enter the following information:

Field Name	Remarks
Party	Party code.
PartyType	Party type code. Party can be for example a person or an organization
LastName	Last name of person
FirstName	First name of person
MiddleName	Middle name of person
OrganizationName	Name of organization if party type is an organization

3. Press the submit button.
4. Press the ok button on the confirmation page.
5. The system will display a message on the status of the submit.

5.3. How to update a party (user)

1. Follow instructions as per How to search for parties(users) and bring up the record.
2. Make modifications.

Field Name	Remarks
PartyType	Party type code. Party can be for example a person or an organization
LastName	Last name of person
FirstName	First name of person
MiddleName	Middle name of person
OrganizationName	Name of organization if party type is an organization

3. Press the update button.
4. Press the ok button on the confirmation page.

5. The system will display a message on the status of the update.

5.4. How to delete a party (user)

1. Follow instructions as per How to search for parties (users) and bring up the record.
2. Press the delete button.
3. Press ok button on the confirmation page.
4. The system will display a message on the status of the delete.

5.5. How to assign an hourly rate to a party (user)

1. Follow instructions as per How to search for parties (users) and bring up the record.
2. Click the 'Rates' link. This will bring up the party with all their assigned rates. All the fields are non editable initially.

Field Name	Remarks
RateType	Rate type code (Normal, overtime etc)
FromDt	From date. Required
ThruDt	Through date. If left blank it means starting from the fromDt onwards into the future.
Rate	Rate
Currency	Rate currency
Comments	Comments

3. To add click on the 'Add row' link. A new row will open up.
4. To edit click on the 'Edit' radio button of the pertinent row. The fields which are enterable will open up for editing.
5. To delete click on the 'Delete' radio button of the pertinent row.
6. Once all the adds/edits/deletes are made press the submit button to save the modifications.
7. Press ok button on the confirmation page.
8. The system will display a message on the status of the submit.

The system will make sure that there are no conflicts in the rate date ranges.

5.6. How to view a parties (users) hourly rate audit trail

1. Follow instructions on How to search for parties (users) and bring up the record.
2. Click on the 'Rates' link.
3. Click on the 'Rates audit trail' link.

5.7. How to assign skills to a party (user)

1. Follow instructions as per How to search for parties (users) and bring up the record.
2. Click the 'Skills' link. This will bring up the party with all their skills. All the fields are non editable initially.

Field Name	Remarks
Skill	Skill code
YearsExperience	Years of experience
Rating	The rating
StartUsingDt	Date when party started using

3. To add click on the 'Add row' link. A new row will open up.
4. To edit click on the 'Edit' radio button of the pertinent row. The fields which are enterable will open up for editing.
5. To delete click on the 'Delete' radio button of the pertinent row.
6. Once all the adds/edits/deletes are made press the submit button to save the modifications.
7. Press ok button on the confirmation page.
8. The system will display a message on the status of the submit.

6. Product

6.1. How to search for products

1. Select the menu option Others->Product->Search
2. Enter the following information: (All fields are optional)

Field Name	Remarks
Product	Product code
Name	Name
Description	Description
IntroductionDt	Date introduced
SalesDiscontinuedDt	Date sales was discontinued
SupplierDiscontinuedDt	Date supplier discontinued
Comments	Comments

3. Press the 'Query' button. The list of products which meet the search criteria will be displayed.
4. To see further details of a specific product click on the product code link.

6.2. How to create a new product

1. Select the menu option Others->Product->new
2. Enter the following information:

Field Name	Remarks
Product	Product code
Name	Name
Description	Description
IntroductionDt	Date introduced
SalesDiscontinuedDt	Date sales was discontinued
SupplierDiscontinuedDt	Date supplier discontinued
Comments	Comments

3. Press the submit button.
4. Press the ok button on the confirmation page.
5. The system will display a message on the status of the submit.

6.3. How to update a product

1. Follow instructions as per How to search for products and bring up the record.
2. Make modifications.

Field Name	Remarks
Name	Name
Description	Description
IntroductionDt	Date introduced
SalesDiscontinuedDt	Date sales was discontinued
SupplierDiscontinuedDt	Date supplier discontinued
Comments	Comments

3. Press the update button.
4. Press the ok button on the confirmation page.
5. The system will display a message on the status of the update.

6.4. How to delete a product

1. Follow instructions as per How to search for products and bring up the record.
2. Press the delete button.
3. Press ok button on the confirmation page.
4. The system will display a message on the status of the delete.

7. Requirement

A work requirement represents the need to perform some type of work. Examples of work requirements are:

- A need to develop a software application.
- A need to manufacture 100 widgets.

7.1. How to search for requirements

1. Select the menu option Requirement->Search
2. Enter the following information: (All fields are optional)

Field Name	Remarks
RequirementId	Requirement Id
RequirementType	Requirement type code
Assigned user	User assigned to this requirement
Name	Name. Will match partial names.
Created date range From	From date
Create date range thru	Thru date

3. Press the 'Query' button. The list of requirements which meet the search criteria will be displayed.
4. To see further details of a specific requirement click on the requirement id link.

7.2. How to create a new requirement

1. Select the menu option Requirement->new
2. Enter the following information:

Note: The requirement Id will be assigned by the system when the form is submitted.

Field Name	Remarks
RequirementId	Requirement Id
RequirementType	Requirement type code
Name	Name
Description	Description
RequiredByDt	Required by date
EstimatedCost	Estimated cost
Currency	Estimated cost currency
Reason	Reason
ProductQty	Product quantity (If the requirement is for a product)

3. Press the submit button.

4. Press the ok button on the confirmation page.
5. The system will display a message on the status of the submit.

7.3. How to update a requirement

You have to be the owner of a requirement to update it.

1. Follow instructions as per How to search for requirements and bring up the record. You will be able to update only the requirements for which you are the owner.
2. Make modifications.

Field Name	Remarks
RequirementType	Requirement type code
Name	Name
Description	Description
RequiredByDt	Required by date
EstimatedCost	Estimated cost
Currency	Estimated cost currency
Reason	Reason
ProductQty	Product quantity

3. Press the update button.
4. Press the ok button on the confirmation page.
5. The system will display a message on the status of the update.

7.4. How to delete a requirement

1. Follow instructions as per How to search for requirements and bring up the record.
2. Press the delete button.
3. Press ok button on the confirmation page.
4. The system will display a message on the status of the delete.

7.5. How to change the owner of a requirement.

This can be generally done only by an admin person who has the appropriate privileges. If you want to hand over ownership of a requirement to someone else you would contact the admin personnel. The admin personnel will do the following:

1. Follow instructs as per How to search for requirements and bring up the record.
2. Enter the new owner in the 'Owner' field.
3. Press the submit button.

4. Press ok button on the confirmation page.
5. The system will display a message on the status of the submit.

8. Security

Supports hierarchical roles. When a role is assigned to a party (user) the party will inherit all the permissions (target, operation combination) assigned to that role along with all the permissions of the roles down the hierarchical chain (Children roles).

8.1. How to setup a party (user) in the system

This can be done only by admin person with appropriate privileges.

1. Follow instructions as per How to create a new party (user) and create the party.
2. Once the new party is created click on the 'Security roles' link.
3. Assign the user the appropriate security roles. (see How to assign a security role to a party).
4. The user needs a password to access the system. Click Others->Reset password and create a new password for the user.
5. Notify the user of their user id and password. This is done outside of the system.

8.2. How to search for roles

1. Select the menu option Security->Role->Search
2. Enter the following information: (All fields are optional)

Field Name	Remarks
Role	Security role code

3. Press the 'Query' button.The list of roles which meet the search criteria will be displayed.
4. To see further details of a specific role click on the role code link.

8.3. How to create a new role

1. Select the menu option Role->new
2. Enter the following information:

Note: The requirement Id will be assigned by the system when the form is submitted.

Field Name	Remarks
Role	Security role code
Description	Description

3. Press the submit button.
4. Press the ok button on the confirmation page.
5. The system will display a message on the status of the submit.

8.4. How to update a role

1. Follow instructions as per How to search for roles and bring up the record.
2. Make modifications.

Field Name	Remarks
Description	Description

3. Press the update button.
4. Press the ok button on the confirmation page.
5. The system will display a message on the status of the update.

8.5. How to delete a role

1. Follow instructions as per How to search for roles and bring up the record.
2. Press the delete button.
3. Press ok button on the confirmation page.
4. The system will display a message on the status of the delete.

8.6. How to create a role hierarchy

1. Follow instructions as per How to search for roles and bring up the record.
2. Click the 'Children roles' link. This will bring up the role with all its assigned children role. All the fields are non editable initially.

Field Name	Remarks
ChildRole	Child security role

3. To add click on the 'Add row' link. A new row will open up.
4. To delete click on the 'Delete' radio button of the pertinent row.
5. Once all the adds/deletes are made press the submit button to save the modifications.
6. Press ok button on the confirmation page.
7. The system will display a message on the status of the submit.

8.7. How to assign permissions to a role

1. Follow instructions as per How to search for roles and bring up the record.
2. Click the 'Role permissions' link. This will bring up the role with all its assigned permissions (target, operation combination). All the fields are non editable initially.

Field Name	Remarks
Target	Target code. The target can be a URL for a service object
Operation	Operation code. The operation that will be invoked on the target

3. To add click on the 'Add row' link. A new row will open up.
4. To delete click on the 'Delete' radio button of the pertinent row.
5. Once all the adds/edits/deletes are made press the submit button to save the modifications.
6. Press ok button on the confirmation page.
7. The system will display a message on the status of the submit.

8.8. How to assign a security role to a party (user)

1. Follow instructions as per How to search for parties (users) and bring up the record.
2. Click the 'Security roles' link. This will bring up the user with all their roles. All the fields are non editable initially.

Field Name	Remarks
Party	Party code
Role	Security role code

3. To add a role click on the 'Add row' link. A new row will open up.
4. To delete a role click on the 'Delete' radio button of the pertinent row.
5. Once all the adds/deletes are made press the submit button to save the modifications.
6. Press ok button on the confirmation page.
7. The system will display a message on the status of the submit.

Note that if roles for a user are changed, they will have to re-login to for the role changes to take affect.

8.9. Target

The target of an operation. (The target and operation together make up a permission). A target is generally a struts action or a service layer object.

8.9.1. How to search for targets

1. Select the menu option Security->Target->Search
2. Enter the following information: (All fields are optional)

Field Name	Remarks
TargetCode	The target code

3. Press the 'Query' button. The list of targets which meet the search criteria will be displayed.
4. To see further details of a specific target click on the target code link.

8.9.2. How to create a new target

1. Select the menu option Security->Target->new
2. Enter the following information:

Field Name	Remarks
Target	The target object of a permission
TargetType	Target type code.
Description	Description

3. Press the submit button.
4. Press the ok button on the confirmation page.
5. The system will display a message on the status of the submit.

8.9.3. How to update a target

1. Follow instructions as per How to search for targets and bring up the record.
2. Make modifications.

Field Name	Remarks
TargetType	Target type code.
Description	Description

3. Press the update button.
4. Press the ok button on the confirmation page.
5. The system will display a message on the status of the update.

8.9.4. How to delete a target

1. Follow instructions as per How to search for target and bring up the record.

2. Press the delete button.
3. Press ok button on the confirmation page.
4. The system will display a message on the status of the delete.

8.10. Operation

The operation to be invoked on a target object. Examples:

- Access a struts action
- Invoke a method on a service layer object.

8.10.1. How to search for operations

1. Select the menu option Security->Operation->Search
2. Enter the following information: (All fields are optional)

Field Name	Remarks
Operation	Operation code
Description	Description

3. Press the 'Query' button. The list of operations which meet the search criteria will be displayed.
4. To see further details of a specific operations click on the operation code link.

8.10.2. How to create a new operation

1. Select the menu option Security->Operation->new
2. Enter the following information:

Field Name	Remarks
Operation	Operation code
Description	Description

3. Press the submit button.
4. Press the ok button on the confirmation page.
5. The system will display a message on the status of the submit.

8.10.3. How to update an operation

1. Follow instructions as per How to search for operations and bring up the record.

2. Make modifications.

Field Name	Remarks
Operation	Operation code
Description	Description
LastModifiedTs	Last modified timestamp
LastModifiedBy	Last modified by

3. Press the update button.
4. Press the ok button on the confirmation page.
5. The system will display a message on the status of the update.

8.10.4. How to delete an operation

1. Follow instructions as per How to search for operations and bring up the record.
2. Press the delete button.
3. Press ok button on the confirmation page.
4. The system will display a message on the status of the delete.

9. Skill

9.1. How to search for skills

1. Select the menu option Other->Skill->Search
2. Enter the following information: (All fields are optional)

Field Name	Remarks
Skill	Skill code
SkillType	Skill type code
Description	Description. Will match partial descriptions.

3. Press the query button. The list of skills which meet the search criteria will be displayed.
4. To see further details of a specific skill click on the skill code link.

9.2. How to create a new skill

1. Select the menu option Others->Skill->new
2. Enter the following information:

Field Name	Remarks
Skill	Skill code
SkillType	Skill type code
Description	Description

3. Press the submit button.
4. Press the ok button on the confirmation page.
5. The system will display a message on the status of the submit.

9.3. How to update a skill

1. Follow instructions as per How to search for skills and bring up the record.
2. Make modifications.

Field Name	Remarks
SkillType	Skill type code
Description	Description

3. Press the update button.
4. Press the ok button on the confirmation page.
5. The system will display a message on the status of the update.

9.4. How to delete a skill

1. Follow instructions as per How to search for skills and bring up the record.
2. Press the delete button.
3. Press ok button on the confirmation page.
4. The system will display a message on the status of the delete.

10. Timesheet

10.1. How to set up a user to enter timesheets

This generally can be done only by an admin person. The following steps should be completed for the user to enter timesheets in the system.

1. Follow instructions as per How to assign a party (user) to a work . Make sure to set the 'ActiveFlg' field to 'Yes'. The user can enter time only for works which they are active for.
2. When a user enters time they have to enter the 'rate type' to use so that the total amount for the timesheet

can be calculated using the appropriate rates.(This calculation is done using a batch job). To set up the rates for the user in the system see How to assign a hourly rate to a party (user).

10.2. How to set up a supervisor to approve a users timesheet

To approve a users timesheet a supervisor has to be set up for the user for this specific purpose.

1. Follow instructions as per How to search for a party (user) and bring up the users record.
2. Click on the TimesheetSupervisor link.
3. Click on the 'AddRow' link to open up a new record.
4. Enter the supervisor Id.
5. Press submit.

10.3. How to search for your timesheets

1. Select the menu option Timesheet->User->Search
2. Enter the date ranges (Both date fields are optional)
3. Press the query button. The list of timesheets which meet the search criteria will be displayed.
4. To see further details of a specific timesheet click on the timesheet id link.

10.4. How to create a new timesheet

The difference between a 'Save' and a 'Submit' is that the 'Save' will save the timesheet to the database but the timesheet will not show up in your supervisor's queue, while a 'Submit' will save the timesheet to the database and *will* show up in the supervisor's queue. So for example you can enter your time at the end of every day into the system and 'Save' it and then at the end of the timesheet period (example on a friday) you would 'Submit' the timesheet. Once you submit the timesheet it will show up in your supervisors's queue. You can still make changes to the timesheets till the supervisor approves it. Once the timesheet is approved you will not be able to make any modifications. All submitted timesheets will have a value in the 'SubmitTs' field.

1. Select the menu option timesheet->User->new
2. Enter the timesheet period start date. You can enter only one timesheet per timesheet period.
3. Click the next button. The timesheet entry form will be displayed.
4. Click on the 'Add row' link. This will open up a row new row where you can enter your time.

Field Name	Remarks
Work Id	One of the work ids the user is assigned to and is active
Rate Type	Rate Type used to calculate amounts for the timesheet
Hours for date1, date2	Hours for the dates.
Approval	Whether approved, approval required. If left

Field Name	Remarks
	blank will return all

- Click on the icon next to work id. You will be taken to a page with all the works you are assigned to. Select the workId by clicking on the workId url.
- If you need to enter time for another work id repeat steps 4 and 5.
- Press the 'save' or 'submit' button. Again only 'Submitted' timesheets will show up in your supervisors queue.
- Press the ok button on the confirmation page.
- The system will display a message on the status of the submit.
 - Timesheet Id is assigned by the system.
 - The totals are calculated during the submit or save process.

10.5. How to update your timesheet

Note that once your timesheet has been approved you will not be able to update it.

- Follow instructions as per How to search for your timesheets and bring up the record.
- Make modifications.

Field Name	Remarks
Hours for date1, date2	Hours for the dates

- To add a new row click on the 'Add row' link. A new row will open up.
- To edit a row click on the 'Edit' radio button of the pertinent row. The hour fields will open.
- To delete a row click on the 'Delete' radio button of the pertinent row.
- Press the 'Save' or 'Submit' button.
- Press the ok button on the confirmation page.
- The system will display a message on the status of the submit.

10.6. How to approve timesheets

Note that the approval person can only view and approve timesheets of users for whom the approval person is set up as the supervisor.

- Select the menu option Timesheet->Supervisor->Search
- Enter the following information(All fields are optional):

Field Name	Remarks
PartyCode	Party code
Timesheets between FromDt	Range start date
ThruDt	Range end date
Approval	Whether approved, approval required. If left blank will return all

- The list of timesheets which meet the search criteria will be displayed.
- To see further details of a specific timesheet click on the timesheet id link.
- Check 'Approved'.
- Add comments (Optional).
- Press the submit button.
- Press the ok button on the confirmation page.
- The system will display a message on the status of the submit.

Note: Once the timesheet has been processed (ie the total amounts for the timesheet are calculated by the batch job) the timesheet is locked. No modifications can be made to it.

10.7. How management searches for timesheets

Only timesheets which have been approved will be displayed to management. The management will be able to see the total amount calculated for the timesheet (The amount is not displayed for other users/supervisors).

- Select the menu option Timesheet->Management->Search
- Enter the following information (All fields are optional):

Field Name	Remarks
PartyCode	Party code
Timesheets between FromDt	Range start date
ThruDt	Range end date

- Press the 'Query' button. The list of timesheets which meet the search criteria will be displayed.
- To see further details of a specific timesheet click on the timesheet id link.

10.8. How to view information of the timesheet batch jobs.

A scheduled batch job calculates the total amount for each timesheet. Any timesheets the batch job fails to process is logged along with the reason for failure. To view this information:

- Select the menu option Timesheet->BatchJob

2. Enter the batch job id (optional) and press 'Search' button.

Note: Need the appropriate privileges for this.

11. Work

A work (work effort) is a fulfillment of a work requirement.

11.1. How to search for Work

1. Select the menu option Work->Search
2. Enter the following information: (All fields are optional)

Field Name	Remarks
WorkId	Work id
WorkType	Work type code
Name	Name. Will match partial names.
Status	Status of the work

3. Press the 'Query' button. The list of works which meet the search criteria will be displayed.
4. To see further details of a specific work click on the work id link.

11.2. How to create a new work

1. Select the menu option Work->new
2. Enter the following information:

Note: The workId will be assigned by the system when the form is submitted.

Field Name	Remarks
WorkType	Work type code
Name	Name
WorkPurposeType	Purpose of this work
Facility	Facility where the work takes place
Description	Description
ScheduledStartDt	Scheduled start date
ScheduledCompletionDt	Scheduled completion date
TotalAmountAllowed	Total amount allowed
Currency	Total amount allowed currency
TotalHoursAllowed	Total hours allowed
EstimatedHours	Estimated hours
SpecialTerms	Special terms
ActualStartDt	Actual start date

Field Name	Remarks
ActualCompletionDt	Actual completion date
ActualHours	Actual hours taken to complete work
Status	Status of the work

3. Press the submit button.
4. Press the ok button on the confirmation page.
5. The system will display a message on the status of the submit.

11.3. How to update a work

1. Follow instructions as per How to search for works and bring up the record.
2. Make modifications.

Field Name	Remarks
WorkType	Work type code
ParentId	Parent id of work
Name	Name
WorkPurposeType	Purpose of this work
Facility	Facility where the work takes place
Description	Description
ScheduledStartDt	Scheduled start date
ScheduledCompletionDt	Scheduled completion date
TotalAmountAllowed	Total amount allowed
Currency	Total amount allowed currency
TotalHoursAllowed	Total hours allowed
EstimatedHours	Estimated hours
SpecialTerms	Special terms
ActualStartDt	Actual start date
ActualCompletionDt	Actual completion date
ActualHours	Actual hours taken to complete work
Status	Status of the work

3. Press the update button.
4. Press the ok button on the confirmation page.
5. The system will display a message on the status of the update.

11.4. How to delete a work

1. Follow instructions as per How to search for works and bring up the record.

2. Press the delete button.
3. Press ok button on the confirmation page.
4. The system will display a message on the status of the delete.

11.5. How to create an association between works

1. Follow instructions as per How to search for works and bring up the record.
2. Click the 'Associations' link. This will bring up the work with all its associated works. All the fields are non editable initially.

Field Name	Remarks
WorkId	The associated work id
WorkAssociationType	The work association type

3. To add click on the 'Add row' link. A new row will open up.
4. To edit click on the 'Edit' radio button of the pertinent row. The fields which are enterable will open up for editing.
5. To delete click on the 'Delete' radio button of the pertinent row.
6. Once all the adds/edits/deletes are made press the submit button to save the modifications.
7. Press ok button on the confirmation page.
8. The system will display a message on the status of the submit.

11.6. How to assign deliverables produced to a work

1. Follow instructions as per How to search for works and bring up the record.
2. Click the 'Deliverables produced' link. This will bring up the work with all its deliverables produced. All the fields are non editable initially.

Field Name	Remarks
DeliverableId	The deliverable produced id

3. To add click on the 'Add row' link. A new row will open up.
4. To delete click on the 'Delete' radio button of the pertinent row.
5. Once all the adds/deletes are made press the submit button to save the modifications.
6. Press ok button on the confirmation page.
7. The system will display a message on the status of the submit.

11.7. How to assign fixed assets to a work

1. Follow instructions as per How to search for works and bring up the record.
2. Click the 'Fixed asset assignment' link. This will bring up the work with all its assigned fixed assets. All the fields are non editable initially.

Field Name	Remarks
FixedAsset	The assigned fixed asset code
FromDt	from date
ThruDt	Thru date
WorkFxdastAsgnStatus	The status of the fixed asset assignment
AllocatedQty	Allocated quantity
Comments	Comments

3. To add click on the 'Add row' link. A new row will open up.
4. To edit click on the 'Edit' radio button of the pertinent row. The fields which are enterable will open up for editing.
5. To delete click on the 'Delete' radio button of the pertinent row.
6. Once all the adds/edits/deletes are made press the submit button to save the modifications.
7. Press ok button on the confirmation page.
8. The system will display a message on the status of the submit.

11.8. How to assign inventory to a work

1. Follow instructions as per How to search for work and bring up the record.
2. Click the 'Inventory Assignment' link. This will bring up the work with all its assigned inventories. All the fields are non editable initially.

Field Name	Remarks
Part	Part code
Quantity	Quantity

3. To add click on the 'Add row' link. A new row will open up.
4. To edit click on the 'Edit' radio button of the pertinent row. The fields which are enterable will open up for editing.
5. To delete click on the 'Delete' radio button of the pertinent row.
6. Once all the adds/edits/deletes are made press the submit button to save the modifications.
7. Press ok button on the confirmation page.
8. The system will display a message on the status of the submit.

11.9. How to assign a party (user) to a work

1. Follow instructions as per How to search for work and bring up the record.
2. Click the 'UserAssignment' link. This will bring up the work with all its assigned users. All the fields are non editable initially.

Field Name	Remarks
Party	Party code
WorkRole	The role for the party for this work
ActiveFlg	Whether the party is active or not. This decides whether the party can enter a timesheet for the work id
Facility	Facility where party works
Comments	Comments

3. To add click on the 'Add row' link. A new row will open up.
4. To edit click on the 'Edit' radio button of the pertinent row. The fields which are enterable will open up for editing.
5. To delete click on the 'Delete' radio button of the pertinent row.
6. Once all the adds/edits/deletes are made press the submit button to save the modifications.
7. Press ok button on the confirmation page.
8. The system will display a message on the status of the submit.

11.10. How to assign products produced to a work

1. Follow instructions as per How to search for works and bring up the record.
2. Click the 'Products produced' link. This will bring up the work with all the products produced. All the fields are non editable initially.

Field Name	Remarks
Product	Product code
Quantity	Quantity

3. To add click on the 'Add row' link. A new row will open up.
4. To edit click on the 'Edit' radio button of the pertinent row. The fields which are enterable will open up for editing.
5. To delete click on the 'Delete' radio button of the pertinent row.
6. Once all the adds/edits/deletes are made press the submit button to save the modifications.
7. Press ok button on the confirmation page.
8. The system will display a message on the status of the submit.

11.11. How to associate requirements to a work

1. Follow instructions as per How to search for works and bring up the record.
2. Click the 'Requirements' link. This will bring up the work with all its associated requirements. All the fields are non editable initially.

Field Name	Remarks
RequirementId	Requirement id

3. To add click on the 'Add row' link. A new row will open up.
4. To delete click on the 'Delete' radio button of the pertinent row.
5. Once all the adds/deletes are made press the submit button to save the modifications.
6. Press ok button on the confirmation page.
7. The system will display a message on the status of the submit.

12. Standards (Related to work types)

Standards are created for work types to help in the estimation on what it takes to get a certain work done.

12.1. How to search for work types

1. Select the menu option WorkType->Search

4. To see further details of a specific work type click on the workType link.

12.2. How to create a new Work Type

1. Select the menu option WorkType->new
2. Enter the following information:

Field Name	Remarks
WorkType	The work type
Description	The description

3. Press the submit button.
4. Press the ok button on the confirmation page.

5. The system will display a message on the status of the submit.

12.3. How to update a work type

1. Follow instructions as per How to search for work types and bring up the record.
2. Make modifications.

Field Name	Remarks
Description	Description

3. Press the update button.
4. Press the ok button on the confirmation page.
5. The system will display a message on the status of the update.

12.4. How to delete a work type

1. Follow instructions as per How to search for work types and bring up the record.
2. Press the delete button.
3. Press ok button on the confirmation page.
4. The system will display a message on the status of the delete.

12.5. How to assign fixed asset standards to a work type

1. Follow instructions as per How to search for work types and bring up the record.
2. Click the 'Fixed asset standards' link. This will bring up the work with its fixed asset standards. All the fields are non editable initially.

Field Name	Remarks
FixedAssetType	The fixed asset type
EstimatedCost	Estimated cost
Currency	Estimated cost currency
EstimatedDuration	Estimated duration. Note this is a text field.
EstimatedQty	Quantity

3. To add click on the 'Add row' link. A new row will open up.
4. To edit click on the 'Edit' radio button of the pertinent row. The fields which are enterable will open up for editing.
5. To delete click on the 'Delete' radio button of the pertinent row.

6. Once all the adds/edits/deletes are made press the submit button to save the modifications.
7. Press ok button on the confirmation page.
8. The system will display a message on the status of the submit.

12.6. How to assign part standards to a work type

1. Follow instructions as per How to search for work types and bring up the record.
2. Click the 'Part standards' link. This will bring up the work type with all its part standards. All the fields are non editable initially.

Field Name	Remarks
PartType	Party type cde
EstimatedCost	Estimatey Cost
Currency	Estimated cost currency
EstimatedQty	Estimated quantity

3. To add click on the 'Add row' link. A new row will open up.
4. To edit click on the 'Edit' radio button of the pertinent row. The fields which are enterable will open up for editing.
5. To delete click on the 'Delete' radio button of the pertinent row.
6. Once all the adds/edits/deletes are made press the submit button to save the modifications.
7. Press ok button on the confirmation page.
8. The system will display a message on the status of the submit.

12.7. How to assign skill standards to a work type

1. Follow instructions as per How to search for work types and bring up the record.
2. Click the 'Skill standards' link. This will bring up the work type with its skill standards. All the fields are non editable initially.

Field Name	Remarks
SkillType	Skill type code
EstimatedPeople	Estimated people
EstimatedDuration	Estimated duration
EstimatedCost	Estimated cost
Currency	Estimated cost currency

3. To add click on the 'Add row' link. A new row will open up.
4. To edit click on the 'Edit' radio button of the pertinent row. The fields which are enterable will open up for editing.

5. To delete click on the 'Delete' radio button of the pertinent row.
6. Once all the adds/edits/deletes are made press the submit button to save the modifications.
7. Press ok button on the confirmation page.
8. The system will display a message on the status of the submit.
