

ITU and ETSI: collaboration

Malcolm Johnson
Director, Telecommunication
Standardization Bureau, ITU

ETSI 49th Meeting of the
General Assembly
Nice, France

Outline

- ITU outline
- ITU and ETSI collaboration
- ITU collaboration with other entities
- Future collaboration

ITU Structure

- General Secretariat: Coordinates and manages the administrative and financial aspects of the Union's activities
- ITU-R: Coordinates radio communications, radio-frequency spectrum management and wireless services
- ITU-D: Technical assistance and deployment of telecom networks and services in developing and least developed countries to develop communication services
- ITU-T: Mission is to ensure an efficient and on-time production of internationally applicable high quality standards covering all fields of telecommunications

ITU Membership

- **Member States** (contributions vary from 19.875k CHF to 9.540m CHF per annum)
 - ITU 191
- **Sector Members** (usual fee 31.5k CHF per annum)
 - ITU-T 330
 - ITU-R 291
 - ITU-D 321
- **Associates** (10.6k CHF per annum)
 - ITU-T 116
 - ITU-R 29
 - ITU-D 5

ITU Plenipotentiary Conference November 2006, Antalya, Turkey

■ Top policy-making body of ITU

- Sets the Union's general policies
- Adopts four-year strategic and financial plans
- Elects the senior management team of the organization, the 46 Member States of Council and the members of the Radio Regulations Board

PP '06 instructs ITU to... (1)

- Maintain close coordination between the three sectors of ITU
- Build confidence and security in the use of ICTs
- Take part in all international discussions relating to internationalized internet domain names
- Strengthen regional presence

PP '06 instructs ITU to... (2)

- Continue studies to meet the needs of public protection and disaster relief
- Assist members in deploying NGN effectively
- Assist in finding appropriate solutions for affordable NGN deployment
- Highlight the contribution of ICTs to development
- Conduct a review of the International Telecommunication Regulations

PP '06 instructs ITU to... (3)

- Prepare for a World Telecommunication Policy Forum in 2009
- Continue activities on IP-based networks
- Provide a summary of activities relating to IP-based networks
- Organize a Worldwide Standardization Roundtable and Coordination Meeting
- Bridge the standardization gap between developing and developed countries

Bridging the standardization gap

- ITU-T asked to provide advice on:
 - Strategies for increased representation and participation in standards making
 - Strategies for developing understanding of key standards technologies
 - Economic and competitive aspects of standards deployment
 - Strategies and guidelines for standards in procurement
 - Promotion of standards for key points of interconnection
 - Adoption of standards in national regulations

Upcoming workshops 2007

- Regional Working Group for Asia and the Pacific Region
New Delhi, India, 3-5 April
- NGN Standardization and Development
Bahrain, 29 April – 3 May
- Ensuring cybersecurity: Standards and technical solutions
Hanoi, Vietnam, 8-10 May
- Joint ITU-T/IEEE workshop on Carrier-class Ethernet
Geneva, 31 May – 1 June
- Multimedia in NGN: Global Perspectives on Standards and Business
Geneva, 10–11 September
- Bridging the Standardization Gap in Developing Countries:
Rwanda, October

Regional working

■ 5 ITU Regional Offices:

- Africa Region
- Americas Region
- Arab Region
- Asia & Pacific Region
- Europe & CIS Region

■ 6 Regional Organisations:

- APT (Asia Pacific)
- Arab Group
- ATU (Africa)
- CEPT (Europe)
- CITELE (America)
- RCC (Commonwealth of Independent States)

■ Various ITU-T regional groups

ITU-T hot topics

- Next generation network (NGN)
- IPTV
- Home networking
- Cybersecurity including identity management (IdM)
- Ubiquitous networks
- Next generation multimedia conferencing
- Videocoding
- Broadband access
- Packet based transport
- Fibre optics

ITU-T Focus Groups

- Identity Management
- From/In/To Cars Communication
- IPTV
- Security Baseline for Network Operators
- NGN Management
- Open Communications Architecture Forum

ITU-T product

- Around 210 new and updated Recommendations are produced each year
- Approx. 90 per cent approved by AAP
- AAP cut approval time by 80 to 90 per cent to as little as 5 weeks and average of 9 weeks
- More than 3100 ITU-T Recommendations are in force
- 50 per cent of contributions to ITU-T work is from Asia
- Wherever appropriate, ITU-T will reference the deliverables of other standards bodies rather than duplicate their work.
- Good cooperation and collaboration is essential between ITU-T and those other bodies

Free Recommendations

- From the beginning of 2007, ITU-T Recommendations are available without charge for a trial period.
- With only a small number of exceptions all in-force ITU-T Recommendations are available in PDF form via a simple mouse click.
- **www.itu.int/ITU-T/publications/recs.html**

MoU between ITU and ETSI

14 June 2000

■ Considering:

- ITU as the intergovernmental and universal organization responsible for worldwide standardization of telecommunications
- ETSI as a regional organization

■ Allows

- Each organization to use the documents of the other in order to advance its own work
- Each will also be able to reference standards texts of the other
- Each organisations experts can participate in the others meetings

Many examples of collaboration (1/3)

- ETSI ES 201 873 series adopted as ITU-T Recommendations Z.140-146 (Testing and Test Control Notation (TTCN))
- 3GPP interface accepted as part of ITU-R Recommendation M.1457 (IMT-2000)
- Substantial cross-fertilization between ETSI~3GPP-SA4 and ITU-T WP 3/16 (speech compression)
- Strong interaction and cross-participation with ETSI TISPAN (and 3GPP CT) for the gateway control protocol extensions (H.248)
- ITU-T Rec. E.218 - Management of the allocation of terrestrial trunk radio Mobile Country Codes: approved at the request of ETSI in order administer TETRA codes

Examples of collaboration (2/3)

- ITU-T Rec. G.722.2 - Wideband coding of speech using AMR-WB - technically aligned with two specs from 3GPP
- ITU-T Rec. Q.1741.4 - GSM/UMTS Release 6: part of 2 series that combine and associate relevant standards based on 3GPP and 3GPP2 specs
- ITU-T Rec. G.993.2 - European band plan extensions for VDSL2 in Annex B - written by ETSI TM6
- ITU-T Recs. J.160-179 - IPCablecom2 – aligned with IMS as defined by the 3GPP
- ITU-T Rec. J.203 - 'TV Anytime' standard - ETSI standard TS 102 822 - heavily referenced

Examples of collaboration (3/3)

- ITU-T SG 12 chair Jean-Yves Monfort also chair ETSI TC STQ
- Members of ITU-T SG 4 WP management team also management of TISPAN WG8
- Ex-TISPAN Chair (Alain Le Roux) also WP chair Study Group 11
- ETSI legal adviser participates IPR Ad-Hoc Group. Further contacts are expected on the implementation of a link to the EPO (European Patent Office) register for declared essential patents
- 86 ETSI members are ITU-T members

Forums/Consortia Approved for Cooperation and Exchange of information

- G Association
- ASN.1 Consortium
- ATSC (Advanced Television Systems Committee)
- AVS (Audio-Visual coding Standard working group)
- DSL Forum
- ETIS (e-and telecommunication information services)
- GSM Association
- Home Gateway Initiative
- IMTC (Multimedia)
- IPDR Organization
- IPsphere Forum
- IPv6 Forum
- Liberty Alliance
- MEF (Metro Ethernet Forum)
- MMTA (Mobile Multimedia Technology Alliance)
- MFA Forum
- MSF (Multiservice Switching Forum)
- NRO (Number Resource Organization)
- OASIS
- OIF (Optical Internetworking Forum)
- OMA (Open Mobile Alliance)
- OMG (Object Management Group)
- SDL Forum Society
- SDL Task Force Consortium
- TM Forum (Tele Management Forum)
- UNICODE
- W3C (World Wide Web Consortium)

Under study: CEPCA (Consumer Electronics Powerline Communication Alliance), EPC Global, MAAWG, UPnP Forum

SDOs Approved for Cooperation and Exchange of Information

- ARIB (Association of Radio Industries and Businesses)
- ATIS (Alliance for Telecommunications Industry Solutions)
- CEA (Consumer Electronics Association)
- CCSA (China Communications Standards Association)
- Ecma International
- ETSI (European Telecommunications Standards Institute)
- IEEE (Institute of Electrical and Electronics Engineers)
- JCTEA (Japan Cable Television Engineering Association)
- NIST (National Institute of Standards and Technology)
- SCTE (Society of Cable Telecommunications Engineers)
- SMPTE (Society of Motion Picture and Television Engineers)
- TIA (Telecommunications Industry Association)
- TTA (Telecommunications Technology Association)
- TC (Telecommunication Technology Committee)

Organizations Qualified for Including References in ITU-T Recommendations

- ARIB (Association of Radio Industries and Businesses)
- ATIS (Alliance for Telecommunications Industry Solutions)
- ATSC (Advanced Television Systems Committee)
- AVS (Audio-Visual coding Standard working group)
- CCSA (China Communications Standards Association)
- DSL Forum
- Ecma International
- EPC Global
- ETSI (European Telecommunications Standards Institute)
- Home Gateway Initiative
- IEEE (Institute of Electrical and Electronics Engineers)
- IMTC (Multimedia)
- ISOC/IETF (Internet Society/Internet Engineering Task Force)
- JCTEA (Japan Cable Television Engineering Association)
- Liberty Alliance
- MAAWG
- MEF (Metro Ethernet Forum)
- MFA Forum
- NIST (National Institute of Standards and Technology)
- OASIS
- OIF (Optical Internetworking Forum)
- OMA (Open Mobile Alliance)
- OMG (Object Management Group)
- SCTE (Society of Cable Telecommunications Engineers)
- SMPTE (Society of Motion Picture and Television Engineers)
- TIA (Telecommunications Industry Association)
- TM Forum (Tele Management Forum)
- TTA (Telecommunications Technology Association)
- TTC (Telecommunication Technology Committee)
- UNICODE
- UPnP Forum
- W3C (World Wide Web Consortium)

Under study: EPC Global, MAAWG, UPnP Forum

3GPP

- 3GPP has 80 members in common with ITU-T
- 3GPP Agreement states: "The results of the 3GPP work shall form the basis of member contributions to the ITU in accordance with existing procedures. 3GPP shall take account of emerging ITU Recommendations on interworking between IMT-2000 family members."
- 3GPP Working Procedures state: "Representatives of ITU-D, ITU-R and ITU-T are invited to participate in the Project Coordination Group for the efficient coordination and exchange of information."
- Iterative process is imperative in order to avoid problems at a later stage
- Communication of requirements an essential ITU input

Global Standards Collaboration

- The mandate of GSC is to provide a venue for the leaders of the Participating Standards Organizations and the ITU to:
 - ...exchange information on the progress of standards development...
 - Collaborate in planning future standards development to gain synergy and to reduce duplication.
 - ...the mandate of GSC is to provide a venue... to:
 - Support the ITU as the preeminent global telecommunication and radiocommunication standards development organization.

World Standards Cooperation (WSC)

- Cooperative mechanism between ISO, IEC and ITU
- Established 2001, and aims at:
 - Strengthening and advancing the voluntary consensus-based international standards system of IEC, ISO, ITU-R and ITU-T
 - Promoting and increasing the visibility of international consensus-based standardization worldwide
- Several initiatives have been undertaken:
 - Workshops
 - Education and training and
 - Promotion of the International Standards system in several contexts.
 - Established common patent policy on 1 March 2007

WSC Members have aligned their patent policies

- Based on ITU-T policy
- ... strongly encourages the disclosure of known patented technology from the outset.
- Allows for companies' IPR to be included in standards as long as it is made available under reasonable and non-discriminatory terms and conditions.
- WSC also adopted Guidelines for the Implementation of the Common Patent Policy and a Patent Statement and License Declaration Form.
- Each of the three WSC organizations also has an online patent database.

Worldwide Standardization Roundtable and Coordination Meeting

- To be held day before next ITU World Telecommunication Standardization Assembly (WTSA), October 2008
- Aims to bring together all standards makers
- Possible themes:
 - Reducing the standardization gap
 - Improving collaboration
- Consultation started on themes and organisation:
tsagroundtable@itu.int

World Telecommunication Standardization Assembly

- WTSA sets direction and structure for ITU-T
- Meets every four years
- Defines the general policy for the Sector inline with Plenipotentiary Conference requirements
- Establishes the study group structure
- Approves their expected work programme
- Appoints their chairmen and vice-chairmen
- WTSA Resolutions are available at:
itu.int/ITU-T/wtsa/resolutions

Future collaboration

- Collaboration on workshops, promoting events etc.
- Increased European involvement in ITU-T
- Improved ITU liaison with 3GPP, especially input on requirements
- Regular high level cooperation meetings
- Participation in Round Table and Coordination meeting
- European Common Proposals to WTSA
- Suggestions on improved working arrangements

Malcolm.Johnson@itu.int
