

ITU-T

ICT Conformity and Interoperability

Meeting with Mr. Goonatilake, Director,
Trade Capacity Building Branch &
Mr. Alcorta, Director, Development Policy
and Strategic Research Branch, UNIDO

Introduction to ITU

- Founded in 1865, oldest specialized agency of the UN
- Standards making one of the ITU's first activities
- 191 Member States, 780 private sector entities
- HQ Geneva, 11 regional offices, 760 staff / 80 nationalities
- Named as one of the world's ten most enduring institutions by Booz Allen
- Five elected officials:
 - Secretary-General
 - Deputy Secretary-General
 - Director of the Radio Bureau (BR)
 - Director of the Telecommunication Standardization Bureau (TSB)
 - Director of the Telecommunication Development Bureau (BDT)

ITU-T Structure

Committed to connecting the world

ITU-T Recommendations connect the world...

Without ITU-T standards you
couldn't make a telephone call
from one side of the world to
another.

Without ITU-T standards the
Internet wouldn't function.

ITU-T Recommendations: Not all standards are equal

- Recommendations become mandatory if adopted in law
- Private standards may confuse users and consumers
- ITU's broad range of stakeholders, and robust processes provide the basis for consensus across sectors and countries
- Market-driven international standards, based on objective information and knowledge.
- Meet the needs and concerns of all relevant stakeholders

Member State Participation

Region A - The Americas (216)

Region B - Western Europe (178)

Region C - Eastern Europe and Northern Asia (73)

Region D - Africa (182)

Region E - Asia and Australasia (460)

Strategic Objectives

1. Develop and publish timely global standards
2. Identify relevant areas for future standardization projects
3. Provide the most attractive forum for standardization in the interest of the membership
4. Promote value of ITU-T to attract increased membership
5. Disseminate information and know-how
6. Cooperate and collaborate with other Sectors and other entities
7. Provide support and assistance to the membership, in particular developing countries

ITU-T Key Features

- Open, transparent, consensus based, fast working, public/private partnership
- technical standards developed by industry members, when consensus placed on website and if no comments after 4 weeks is in effect approved by 191 governments
- ITU standards are therefore truly global, open standards, unlike those of many other standards bodies, fora or consortium that claim to produce global and open standards, available free of charge
- Publicly available database of products and services meeting ITU standards
- Organising interoperability events to prove interoperability of different vendors equipment
- Common IPR policy with ISO and IEC (FRAN)

Committed to connecting the world

Importance of Global Standards

- Global Standards essential in a complex world
- Standards make things easier
- Essential for international communications and global trade
- Drive competitiveness, for individual businesses and world economy
- Help organisations with their efficiency, effectiveness, responsiveness and innovation
- Lower prices and increase availability by reducing technical barriers and promoting compatibility between systems and networks
- Manufacturers, network operators and consumers benefit

Standards proven economic tool

- WTO trade report 2005
- British Standards Institute (BSI): standards make annual contribution GBP 2.5 billion.
- German standards body (DIN): economic benefits standardization about 1% GDP.
- Canada: 17 % of labour productivity increase and nine per cent of growth of GDP 1981-2004.
- Standards have a significant effect on limiting the undesirable outcomes of market failure.
- The work of ITU has smoothed the more economical introduction of new technologies

ITU-T collaboration

44 formal partnerships.

ICANN
The Internet Corporation for Assigned Names and Numbers

I E T F

Vienna Agreement between the international standards orgs and their European regional counterparts.

- World Standards Cooperation
 - Patent policy & Joint events
- ITU-T and IEEE
 - MoU & Joint events
- Global Standards Collaboration
 - Supports ITU as preeminent global ICT standards organization.

ITU-T and 3GPP

ETSI

➤ Management meetings

ITU-T and IETF

➤ Management meetings

ITU-T and ICANN

➤ Management meetings

- E-Business MoU: IEC, ISO, ITU and UN/ECE

Committed to connecting the world

INTEROPERABILITY

The world's communication network is arguably mankind's most complex engineering project.

The 7-As

an anywhere, **a**n anytime, **a**n anybody, for **a**n anything, with
an any equipment for **a**n any data-voice-video using
an any network-type

**Couldn't have been done without ITU
standards for interoperability**

Committed to connecting the world

Why ITU-T WTSA-08 Resolution 76

- Major concerns were raised at WTSA-08, especially from developing countries, due to lack of performance and of compliance to conformity requirement and interoperability
- Market invaded by counterfeit products
- Need of developing countries to be assisted in deploying testing facilities and in capacity building opportunities in the regions
- No record of products conforming to ITU standards
- No proof of interoperability

ITU's Conformity and Interoperability Programme

Four Action Lines:

1. Creation of a conformity database
2. Organisation of interoperability events
3. Develop human resources capacity through workshops
4. Assist establishment of test facilities in developing countries

Committed to connecting the world

Conformity assessment

➤ **Industry issues:**

- Increasing business opportunities
- Time to market, costs for testing
- Increase of market outreach thanks to Mutual Recognition Agreements and Arrangements

➤ **End users issues:**

- Requirements for Quality of Service
- Interoperability and legacy to existing infrastructure
- Costs for non conformity & non interoperability

The ITU Pilot Conformity Database

- Voluntary and free.
- Open to all ITU members. Non-members may participate on a case by case basis
- **For The vendor:** Visibility in the marketplace
- **For Customers:** Increased trust
- **Testing by** 1st, 2nd, 3rd party accredited laboratories
- **Or** 3rd party accredited certifiers
- **Plus Supplier's Declaration of Conformity (SDoC)**

Supplier's Declaration of Conformity (ISO 17050-1)

- Company inputs data directly into database
- Product category & Name of product
- ITU-T standard(s)
- Laboratories accredited in accordance with ISO standards (normally by ILAC)
- 3rd party accredited certifier (normally by IAF)
- Acceptance of liability for the Supplier's Declaration of Conformity

The ITU Conformity Programme

Committed to connecting the world

Implementation of the ITU Conformity Programme

Supplier's Declaration / Certification – Risk relationship

Committed to connecting the world

Interoperability initiatives

- TSB organizing calendar of interoperability events in collaboration with relevant SDOs/forums/consortia
- Possible hot topics:
 - Home Networking; VDSL; GPON

IPTV Interop event

ITU-T Interop Event on IPTV 20 to 23 July 2010 Geneva, Switzerland

The first ITU-T Interop Event will demonstrate the state of maturity and industry adoption of ITU-T standards for IPTV.

Manufacturers of set top boxes, content servers and other equipment are invited to showcase their products and to test for interoperability.

Testing will take place 20-21 July, with vendors showcasing interoperability to potential customers (broadcasters and content providers) 22-23 July.

Internet Protocol Television, or IPTV, is a major business opportunity for telcos, content providers and existing broadcasters.

ITU's IPTV Global Standards Initiative has created standards that will encourage innovation, mask the complexity of services, guarantee QoS, ensure interoperability and ultimately help players remain competitive.

What is an ITU-T Interop event?

ITU-T Interop events bring together developer engineers to test the interoperability of ITU-T standards and relevant prototypes, while a standard is being drafted. Bugs and glitches in the standard and prototypes are therefore identified and resolved early in the standard development process. Participants can then showcase their products and interoperability with the products of other vendors.

What standards?

Targeted ITU-T Recommendations include:
ITU-T H.701, H.721, H.740, H.750, H.761,
H.762, H.770

Write to us about this or future ITU-T Interop events at

ITU-T Interop Event on IPTV, Geneva, 20-23 July 2010

- Study Groups developed a consistent set of technical specifications or standards under the umbrella of the IPTV Global Standards Initiative (IPTV-GSI).
- The first IPTV Interop event will demonstrate the state of maturity and industry adoption of ITU-T standards for IPTV.
- Manufacturers of set top boxes, content servers and other equipment are invited to showcase their products and test for interoperability

Committed to connecting the world

TSB studies in progress with...

- Experts and External Organizations
- IEC, ISO,
- Regulators,
- Laboratories,
- Training institutions
- Governments
- UNIDO, WTO
- Accreditation bodies (ILAC, IAF, BIPM)
- Private sector, members and non-members of ITU

Committed to connecting the world

ITU-T Study Groups/JCA

- SGs will prepare ITU-T Recommendations in view of conformity assessment and interoperability testing
- SGs will maintain a list of Recommendations where test suites are available
- **Joint Coordination Activity on Conformity and Interoperability Testing (JCA-CIT)**
- Facilitates information sharing and collaboration between ITU-T Study Groups and relevant outside bodies such as ETSI, ISO and OMA.
- Seeking input with regard to the implementation of tasks stated in WTSA-08 Resolution 76
- Development of a common understanding of Conformance vs. Interoperability testing
- Developing a roadmap for the implementation of the four action lines agreed by Council-09 and taking into account a draft action plan

Regional Consultation Meetings 2010

- Americas – 6 July, Quito, Ecuador
- Africa – 30 July, Nairobi, Kenya
- Asia Pacific – 16-17 September, Sydney, Australia

Continue the discussion to better implement the four action lines adopted by Council 2009.

Improve the ITU pilot conformity database to meet the requirements of all the stakeholders in the spirit of the WTSA-08 Resolution 76 addressing the needs of developing countries on this subject.

Contents:

Consultation meetings

- Why Conformity and Interoperability ?
- Resolution 76: a short review
- The action lines decided by ITU Council-09
- Impact on developing countries: Benefits of the ITU C&I Programme, costs of lack of conformity and/or interoperability
- Impact on industry, testing, MRAs, associated costs, time to market
- Improvements to the ITU pilot database
- Encouraging interoperability testing

Audience

- Industry / Vendors
- Administrations
- Operators/service providers
- Standards developers
- Regulators
- Laboratories
- **Civil society**

Committed to connecting the world

Capacity building and test centers

- The ITU-T Secretariat (TSB) is implementing proposals on human capacity building in close collaboration with the ITU-D Secretariat (BDT):
 - Hold workshops and tutorials on conformity assessment and interoperability on the BDT project on International Telecommunication Testing Center.
- The ITU-T will assist in the establishment of test facilities in developing countries
- A project is in progress to establish a test center in Tanzania
- Looking for cooperation UNIDO
