

ITU-T

Empowering global ICT development

XVI Meeting of Permanent Consultative
Committee I: Telecommunications /
Information and Communication
Technologies (PCC.I)
Ushuaia, Tierra del Fuego, Argentina
May 11 to 14, 2010.

2009: A year of highlights

Study Groups

- Despite financial crisis many study groups saw increased participation
- Remote participation on the rise
 - 120 e-meetings
- First global standard for a fully networked home
 - ITU-T Rec. G.9960; ex G.hn
- Universal charger for mobile phones
- Methodology to measure the impact of ICTs on climate change with the involvement of 20 other organizations
- Handbooks on Optical fibres, cables and systems, converged networks, and the security manual

2009: A year of highlights

Workshops

- 30 events, 2500 participants
 - Implementation of WTSA-08 decisions
 - Bridging the standardization gap
 - ICTs and climate change
 - Cybersecurity
 - NGN
 - Accessibility
- First fully virtual ITU symposium on ICTs and climate change
 - Organised together with the KCC and TTA
- 5th Fully Networked Car

Recent Activities in the Region

- ITU-T Study Group 5 Buenos Aires, Argentina 12-16 April 2010
- ITU-T Workshop on "Interactions of Voiceband Signal Processing Functions and their End-to-End Coordination" Germantown, Maryland, USA, 21 April 2010
- Seminar on ITU-T hot topics for standardization and Kaleidoscope event: Innovations for Digital Inclusion Mar del Plata, Argentina, 31 August - 01 September 2009
- ITU-T Study Groups 11 and 13 and IPTV-GSI Mar del Plata, Argentina 2-12 September 2009
- ITU panel "Globalization of Standardization and Making the International Telecommunication Union (ITU) Accessible" at the 18th Biennial TDI Conference "Where Access begins" Washington DC, USA, 30 July - 1 August 2009
- ITU Symposium on ICTs and Climate Change and Forum on "Implementation of decisions of the World Telecommunication Standardization Assembly (WTSA-08)" Quito, Ecuador, 7-10 July 2009
- Regional Seminar on the economic and financial aspects of telecommunications for Member Countries of the Study Group 3 Regional Group for Latin America and Caribbean (SG3RG-LAC) (former TAL Group) Lima, Peru, 23 - 24 June 2009

Region's Chairmen and Vice-Chairmen

- Bruce Gracie, Chairman TSAG, Industry Canada, Canada
- Stephen J. Trowbridge, VC TSAG, Alcatel-Lucent, USA
- Marcos Pérez García VC, SG2, Empresa de Telecomunicaciones de Cuba, S.A. (ETECSA), Cuba
- Steven D. Lind, VC SG 2, AT&T, USA
- Leslie Joseph Martinkovics, VC, SG3, Verizon, USA
- Héctor Mario Carril, VC SG5, Secretaria de comunicaciones, Argentina
- Arthur Webster, Chairman SG 9, US Department of Commerce, USA
- Charles A. Dvorak, Chairman SG 12, AT&T, USA
- Júlio Cesar Fonseca, VC SG15, Regional focus group coordination, ANATEL, Brazil
- Mark T. Neibert, VC SG16, Ygomi, USA
- Antonio Guimaraes, VC SG17, ANATEL, Brazil

The network knocks at your door

- Home Networking to achieve interoperability on a global scale
 - PC World (US) 13.12.08: "The powerful world standards organization ...[ITU].. has reached agreement on G.hn a set of specifications that would encompass phone lines, power lines, and coaxia cable to provide HDTV room to room..."
- Now: G.hn for Smart Grid

Future networks

- Focus Group
- Collect and identify visions of future networks
- Next Meetings: Geneva; Brazil; India
- Report will be presented to Council Dedicated Group on Internet Governance

ITU-T's quantum leaps in speech, audio and video quality

- Video codec H.264 in HDTV, iPhone, Blu-ray, 3G, etc
- 2008 Primetime Emmy award
- Call for technical contributions for next generation
- Extension of work on speech coding:
 - Wider bandwidths, richer user experience

Intelligent Transport Systems

- New work:
 - Wideband communication in cars
 - Vehicle gateway protocol

- ITU, ISO and IEC and Geneva Motor Show
 - Annual Event

Safety in the cyber world

Study Group 17

- identity management (IdM)
- object identifiers (OID)
- Security standards for:
 - NGN
 - IPTV
 - Home networks,
 - Ubiquitous sensor networks
 - Mobiles
 - Traceback
 - Countering spam (EVCert)
- Road map of security standards:
itu.int/ITU-T/studygroups/com17/ict
- Cybersecurity Information Exchange Framework (CYBEX)
- Security Workshop, Geneva 6-7 December 2010

Accessibility

- Champions principles Universal Design enshrined in the UN Convention on Rights of Persons with Disabilities
- Includes accessibility features in all standards
- Strong advocacy focus
- Group to coordinate activities on accessibility
- ITU led Dynamic Coalition on the Internet and Accessibility at the Internet Governance Forum (IGF)
- Proposed new Focus Group on Interoperability of Accessibility protocols

ITU
and climate
change

ICTs and Climate Change

UN Secretary-General,
Ban Ki-moon:
"ITU is one of the very important
stakeholders in the area of climate
change."

- Focus Group on ICTs and Climate Change
- ITU led Dynamic Coalition on Internet and Climate change at the Internet Governance Forum (IGF)
- Participation in COP15
- Establishing close liaison with UNFCCC

Participants in
Focus Group ICT
and Climate
Change

Committed to connecting the world

Environment and Climate Change

ITU-T Study Group 5:

- Reducing energy consumption
- The promotion of Next Generation Networks (reducing power consumption by up to 40%)
- Recycling, e-waste, lifecycle analysis
- All new standards are now checked for energy efficiency

Universal charger

- ITU-T Recommendation L.1000
- Delivers 50% reduction in standby energy consumption, will eliminate up to 82,000 tonnes of redundant chargers, and cuts GHG emissions by at least 13.6 million tonnes CO2 annually

Common Methodology

- Common methodology for measuring ICT carbon footprint
- Without, it will be impossible to provide meaningful comparisons
- Helps to establish the business case to go green
- Over 20 organisations participate in the ITU group
- Standards on life cycle environmental impact of ICTs goods and services, and ICT projects, November 2010

Economic and policy issues

Study Group 3

- SG 3 deals with international tariff and charging
- Recommendations on charging and accounting for International Internet Connectivity
- Recommendations on charging and accounting for international mobile telephony
- Guidelines for resolution of disputes regarding charging and accounting
- Development of charging and accounting/settlement mechanisms

Technology Watch: Scouting for future technologies ...

- Recent papers:
 - Remote collaboration tools
 - Ubiquitous Sensor Networks
 - ICTs and Climate Change
 - Telepresence
 - High-performance video-conferencing
 - Intelligent Transport Systems
 - Lawful interception (LI)
 - Next-Generation Networks (NGNs) and energy efficiency
 - Mobile applications
 - Batteries for portable ICT devices
- Upcoming: ICTs and food security, network robotics, telebiometrics
- New Briefing Reports published in ITU News

Chief Technology Officer (CTO) meeting

- Nineteen major CTOs
- Recognition of need for review of standardization landscape
- Results will be presented at next meeting, Paris, 29 October.

Nokia Siemens
Networks

HITACHI
Inspire the Next

Microsoft®

TOGO TELECOM

psytechnics
voice & video performance management

Committed to connecting the world

Next generation electricity

- Chief Technology Officer Group highlighted Smart Grid as a priority area
- Focus Group on Smart Grid will
 - Identify impacts on standards development
 - Investigate ITU-T study items
 - Familiarize ITU-T with emerging attributes of smart grid
 - Encourage collaboration between ITU-T membership and utilities

In the cloud

- WTPF participants highlighted Cloud as a priority area
- Focus Group on Cloud Computing will
 - Identify potential impacts on ITU-T standards development
 - Investigate future study items
 - Analyze how interoperability can be assured
 - Familiarize ITU-T with emerging attributes and challenges of cloud computing

Kaleidoscope 2010

- ***Pune, India, 13-15 December 2010***
- Exhibition by local universities
- Best paper awards **\$10,000**
- Proceedings → IEEE Xplore online library
- **New this year:**
 - Standards Corner (tutorial)
 - Jules Verne's Corner
(SciFi writers and dreamers)
- Additional info: itu-kaleidoscope.org/2010
- Associated events: Focus Group on Future Networks
- Third IPTV Interoperability event

Council 2009/10 Decisions

- Adopted budget allowing TSB to implement its work programme and WTSA-08 Action Plan & approved TSB Reorganization
- Endorsed recommendation to introduce new membership categories for academia and reduced fee for SME companies from developing countries.
- Endorsed recommendation to set up new group on IPv6, and preparations for WCIT to revise ITRs
- Agreement to hold WTSA/WCIT back to back
- Endorsed recommendations on conformity and interoperability

Admission of Sector Members from Developing countries

- ITU Council supports proposal to reduce cost to 1/16 of the Sector Member contributory unit = CHF 3,975
- Proposal to be reviewed at PP'10

Admission of academia, universities and their associated research establishments

- ITU Council supports proposal to reduce cost to 1/32 of the Sector Member contributory unit = CHF 1,987
- Academia Member would not participate in approval process of Recommendations. Proposal to be reviewed at PP'10

ITU and IPv6

- Massive deployment of Internet-related resources=depletion of IPv4 addresses.
- ITU actively promoting IPv6 deployment
- New ITU-T/D Group established two CGs
- Next meeting 1-2 September
- Open participation

The International Telecommunication Regulations

- ITRs catalyzed global telecoms liberalization and facilitated Internet
- Adopted to:
 - Provide a basis for the provision & operation of international telecommunication services
 - To designate responsibilities of Admins and Operators
 - To provide general principles, even for commercially-negotiated arrangements
- Revision under discussion since PP98
- WTSA and WCIT 5-30 November 2012
- ITRs: Abrogate, revise or update? New issues?

Conformity and interoperability

- Conformity assessment benefits manufacturers, service providers, users and regulators and supports sustainable development.
- Conformity gives confidence and facilitates access to world markets.
- All successful SDOs have testing specifications; conformance testing to determine compliant products; and interoperability testing.

ITU's Conformity and Interoperability Programme

Four Action Lines:

1. Creation of a conformity database
2. Organisation of interoperability events
3. Develop human resources capacity through workshops and tutorials
4. Assist establishment of test facilities in developing countries

Committed to connecting the world

The ITU-T “Pilot” Conformity Database

- Will provide a source of what products have been successfully tested to ITU-T Recommendations.
- Pilot conformity database follows ISO/IEC 17000-series: Requires the issue of a Supplier's Declaration of Conformity (SDoC) (ISO/IEC 17050)
- Voluntary and free, open to ITU members. Non-members may participate on a case by case basis
- Testing
 - 1st, 2nd, 3rd party accredited labs conformity assessment
 - 3rd party accredited certifiers

Committed to connecting the world

IPTV Interop events

ITU-T Interop Event on IPTV 20 to 23 July 2010 Geneva, Switzerland

The first ITU-T Interop Event will demonstrate the state of maturity and industry adoption of ITU-T standards for IPTV.

Manufacturers of set top boxes, content servers and other equipment are invited to showcase their products and to test for interoperability.

Testing will take place 20-21 July, with vendors showcasing interoperability to potential customers (broadcasters and content providers) 22-23 July.

Internet Protocol Television, or IPTV, is a major business opportunity for telcos, content providers and existing broadcasters.

ITU's IPTV Global Standards Initiative has created standards that will encourage innovation, mask the complexity of services, guarantee QoS, ensure interoperability and ultimately help players remain competitive.

For more information visit:
itu.int/itu-t/gsi/iptv
itu.int/interop

What is an ITU-T Interop event?

ITU-T Interop events bring together developer engineers to test the interoperability of ITU-T standards and relevant prototypes, while a standard is being drafted. Bugs and glitches in the standard and prototypes are therefore identified and resolved early in the standard development process. Participants can then showcase their products and interoperability with the products of other vendors.

What standards?

Targeted ITU-T Recommendations include:
ITU-T H.701, H.721, H.740, H.750, H.761,
H.762, H.770

Write to us about this or future ITU-T Interop events at
tbinterop@itu.int

International
Telecommunication
Union

Committed to connecting the world

Capacity Building

- Develop expertise in conformity and interoperability testing
- In collaboration with BDT
- Plan to organise tutorials at established test centres around the world
- Joint workshops planned with UNIDO

Establishment of conformity test centres in developing countries

- Need to build partnerships with relevant organisations: UNIDO, ISO (CASCO), IEC, IAF and ILAC
- UNIDO has a programme to assist in establishment of accreditation bodies and conformity test centres in developing countries
- UNIDO offer of collaboration

Regional Consultation Meetings 2010

- Americas – 6 July, Quito, Ecuador
- Africa – 30-31 July, Nairobi, Kenya
- Asia Pacific – 16-17 September – Australia

Continue the discussion to better implement the four action lines adopted by Council 2009.

Improve the ITU-T pilot conformity database to meet the requirements of all the stakeholders in the spirit of the WTSA-08 Resolution 76 addressing the needs of developing countries on this subject.

Business Plan

- Council endorsed need to develop a business plan for the long term implementation of the programme
- Need to first determine the demand for each of the action lines
- Amend programme in light of further consultations

Plenipotentiary Conference 2010

4 to 22 October 2010

The **key event** at which **ITU Member States** decide on **ITU's future role of the organization**.

Sets the Union's general policies, adopts four-year strategic and financial plans and elects the senior management team, the members of [Council](#) and the members of the [Radio Regulations Board](#).
