

iOS6 Development for Beginners

Lab Exercise 6

1) Follow the steps demonstrated in the video lecture to set up a new iOS application. Use the following settings when prompted:

2) Open the storyboard and create a user interface similar to the one pictured below:

- * Single View Application
- * Product Name: CountryCurrency
- * Organization Name: As You Desire
- * Company Identifier: As Appropriate
- * Devices: iPhone
- * Use Storyboard: Checked
- * Use Automatic Reference Counting: Checked

3) Using the interface you just built, create an application that has the following functions and requirements:

A) The Spinner Wheel is to be populated with the following Country names:

England, United States, India, Australia, Canada, France, The Netherlands, South Africa and London.

B) The currencies of each country are as listed.

Test and debug your application if necessary.

4) Program the delegate of the spinner so that currency appears as soon as the user selects a country with the spinner. Test and debug your application if necessary.

- England: British Pound
- United States: United States Dollar
- India: Indian Rupee
- Australia: Australian Dollar
- Canada: Canadian Dollar
- France: European Euro
- The Netherlands: European Euro
- South Africa: South African Rand
- London: British Pound
